## Production of high quality sunflower oil in plastic packaging of 1 and 5 liters

### Unrefined, natural aroma, first pressed. Top grade.

- Ideal for preparing salads, sauces and food preservation.
- Can be used for frying and cooking. Natural aroma and taste of the oil will complement and saturate your dish.
- Rich in vitamins A, D, E, K. Contains Omega-9 unsaturated fatty acids.
- Particularly beneficial for the health of pregnant women and children from 6 years and older.

### Refined, deodorized. Top grade.

- The oil does not burn or foam, ideal for frying, baking, making sauces and preserving food.
- Low-temperature physical refining with the best conditions for preservation of vitamins.
- In low-temperature refining, fresh raw-pressed oil is used.

## Product advantage

**Our range of sunflower oils is in high demand among consumers seeking a healthy lifestyle.**

The oil is extracted exclusively by pressing method

High-quality 100% natural raw materials are used, without artificial additives and odors, without thickeners and preservatives

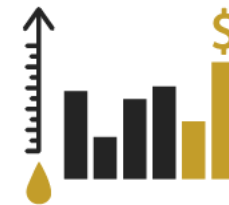

We do not use gasoline solvent extraction

We produce only virgin oils

We do not use reagents that artificially improve quality indicators

Our product is not blended with palm and other oils for cost reduction

# Rus OIL

*«We encourage you to try and appreciate the taste of our 100% natural sunflower oil, which we enjoy to produce and eat ourselves!»*

**When organizing supplies, coordination with Russian Railways, logistics operators is ensured, transportation costs are paid, cargo is monitored in transit, and other actions are performed that are necessary for the successful delivery of products to their destination.**

Dry cargo can be delivered in bulk, in soft containers (disposable, big bags), in polypropylene bags, paper bags of different sizes.

Liquid cargo is transported in tanks, tank containers, barrels.
